

iFinity)))™ Digital Wireless Audio Transmitter

Enjoy your music in every room of your house and outdoors without running long wires and breaking through walls with the iFinity™ Wireless Audio Transmitter.

Stream music from your iPod to your speakers, make your home theater wireless, enjoy your favorite CD collection throughout your home, send wireless music to speakers on your patio. Your imagination is the limit.

Unlike Bluetooth, music is sent wireless at full CD quality up to 600 feet away without audio compression to up to four wireless devices throughout your home.

The transmitter connects to line-level audio outputs, amplified speaker outputs and also has cradle to plug in your iPod or iPhone.

The iFinity™ Wireless Audio Transmitter can be paired with your wireless device with the simple push of a button and is highly robust against interference from other wireless devices.
